Get Paid Faster Solution By Offering Your Customers Convenient Electronic Payment

Did you know, on average it costs a business \$8.44 to invoice a customer and process a paper cheque payment? Source: www.Fidesic.com

At TelPay, we think that is too much and are excited to announce our new Get Paid Faster solution that offers customers the convenience of electronic payments. Now businesses across Canada can offer all of their customers a simple and cost effective online electronic payment option.

Before TelPay, most businesses have been limited to accepting costly credit card or cheque payments from their business customers. Today, businesses can add electronic payments to that payment option list.

TelPay's new Get Paid Faster is an easy-to-use solution that lets customers make payments electronically to their vendors, eliminating the need for cheques, envelopes, stamps or credit cards and businesses get paid faster.

Carol-Ann Kjartanson of GHY International stated:

The Get Paid Faster solution is great. It's faster and more convenient than processing cheque payments. TelPay is better than EFT payments because they consolidate our payments and send us a remittance report for easy reconciliation. Our customers benefit by the simplicity and easy way of paying our invoices electronically.

Finally, the Get Paid Faster is an electronic payment option businesses can offer to their customers. Contact TelPay at www.telpay.ca and learn how businesses can "Get the Button Working for Them."

Since 1985, TelPay Incorporated is the largest independent processor of bill payments in Canada, serving thousands of businesses and hundred of financial institutions with advanced bill payment software, online bill payment, banking modules and payment consolidation services. Today TelPay processes over 21 million electronic payments worth \$12 billion dollars annually, saving our clients' time and money.
