

The Better Way to Pay.

Media Release

October 15, 2014

**Send Money across the Border
Electronic USD Payments**

Winnipeg – In this global environment, many companies are located in Canada, but do business in the USA. As cross-border trade accelerates, bank wires have become increasingly expensive for both the sender and receiver. With fraud as a major concern, sending a cheque is not the safest option. As a result, there has been significant demand over the last few years for a more secure and cost effective solution.

Telpay is pleased to offer our new USD Payments solution for those companies that need to pay a supplier, consultant or contractor located in the USA. All a company requires is a Canadian U.S. Dollar (USD) bank account and Telpay does the rest. Built right into the Telpay for Business software, companies can now easily send money from a Canadian USD business account to any U.S. bank account.

Simple, Convenient and Low Cost:

- Avoid costly wire transfers
- Reduce fluctuating currency exchange rates
- Convenience of paying right from your computer
- Safe with clear audit trail
- Telpay notifies recipient of payment by email
- Pay only \$2 per transaction

About Telpay

Celebrating 29 years in the payment industry, Telpay is Canada's business electronic payment pioneer, now processing electronic payments worth over \$14.6 billion in payments in 2013.
