

The original payment platform just evolved.

Meet the **NEW** Telpay for Business.

Our new cloud-based platform was developed by experts in the payment industry to make accounting and bookkeeping one of the best managed, smoothest, and most transparent parts of your business.

This evolution was the direct result of our decades of experience - and our clients' feedback - so it's loaded with your most-requested features and tools designed to help streamline your day (yes, even payroll day).

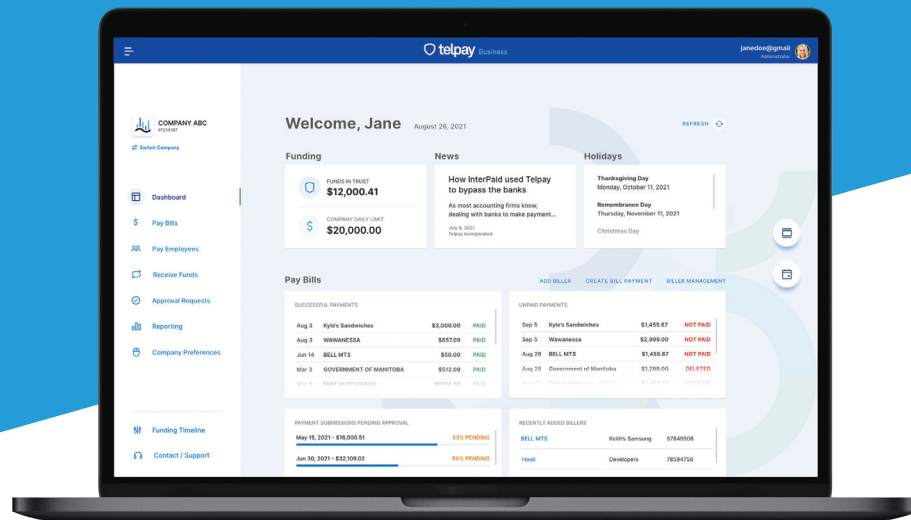

It's a new platform from the original payment industry innovator. See what it can do for you.

More powerful. More portable. More flexible.

Telpay has designed a cloud-based platform that makes your job easier than ever - and maybe even fun again. Everything we do is by and for accountants, bookkeepers, and payment professionals, and we've created a platform that will truly work for you.

- ▶ Save time and money by automating your payables and receivables workflow
- ▶ Increase visibility and control of your payments to maximize productivity - all from one place
- ▶ Strengthen vendor and supplier relationships with faster invoice approvals and quicker payments
- ▶ Enjoy more peace of mind and greater security
- ▶ Get some time back in your day thanks to new automations and streamlined, intuitive functionality

SIMPLICITY

We've engineered our platform to be as streamlined and intuitive as possible. It starts with a single sign-on that gives you the ability to login for multiple accounts - and it stays just as simple from there.

A customizable dashboard keeps everything at your fingertips and all your most-important data in view

We've pre-loaded thousands of billers into our system (and if the one you're looking for isn't there, it's easy to add it)

We help you manage more from an all-in-one platform - update QuickBooks suppliers from Telpay, reconcile automatically, handle accounts payable, accounts receivable and payroll direct deposit from a single platform, and so much more

CUSTOMIZATION & AUTOMATION

Why do the work when you don't need to? Telpay helps you customize, automate, and sync up data. Your workflow has never been more streamlined.

Seamless integration with QuickBooks and other accounting platforms - with all updates and transactions synced in real time

Set a schedule to pay credit cards, utilities, CRA and government remittances, and more

A platform that works the way you need it to - nickname billers, edit pending payments, and send approval reminders

A real-time link between your accounting platform and Telpay makes month-end reconciliation easy

COLLABORATION

Spend your time crossing things off your list - not tracking down people, information, and approvals. We've designed a platform that allows for seamless collaboration with your team, whether they're in the office or not.

Set up to 21 approvers with customizable levels of access and maximum payment amounts

A cloud-based platform means that remote approvals can happen from anywhere (even on their mobile device)

You and your approvers can add comments to pending payments - letting you highlight questions and resolve issues quickly and easily

Add invoice details and additional notes

FLEXIBILITY

We want you to be able to work your way, so we've designed a platform that conforms to however you like to work - and wherever you like to do it from.

Our secure cloud-based platform lets you update, approve, schedule, and check in on your work from anywhere - and on any device.

Schedule future-date payments (and get tomorrow's work done today)

Set a primary payment type - plus choose a second payment method so you can be confident that every payment happens on time

TRANSPARENCY

Never wonder what's happening with payments, payroll, approvals - or anything else you're working on. View it all in real time, in one place.

View payment status, pending pay runs, and pending approvals in real time

Control and manage cash flow with data payment transparency

Flag pending approvals for follow-up

A robust audit trail provides visibility into your payment transactions

Run simple and comprehensive reporting using data synced from QuickBooks or other accounting platforms

The original payment Industry innovator.

Since 1985, Canadian companies have trusted Telpay to deliver payment solutions through leading technology - first by phone, then online, and now through the cloud. Our clients have made us one of the country's most trusted and largest independent payment companies, processing more than \$20.2 billion in payments every year.

Our Telpay for Business platform helps accountants, bookkeepers, and business owners move money electronically - quickly, simply, and securely - for payroll direct deposit, CRA payments, government remittances, supplier payments, and utility payments.

Everything we do is for our customers - from our platform to our ongoing service and support.

Let us show you what Telpay can do for you.
